Subsequent authors are based on level of contribution with second author providing a higher level of contribution than the third author.”
 - Publications should be organized by category of work (e.g., refereed publications, non-refereed publications, books, proceedings, reviews, notes, letters), then sorted by date of publication beginning with the most recent work.
 - List refereed or peer-reviewed publications separately from non-refereed publications.
 - Specify work that is accepted and in press, with estimated date of publication.
